

Model #1169 Ampere-Time Totalizer

The #1169 ampere-time totalizer is a solid-state precision instrument which integrates current and time, providing a very accurate record of accumulated ampere-hours.

What You Get

The Model #1169 ampere-time totalizer comes housed in an environmentally protected enclosure. It is available with a re-settable or non-resettable counter.

Each unit is factory calibrated for 50 or 100 Mv shunts and all other rectifier outputs at no additional cost.

The Model #1169 provides an accuracy of 1% at the amperage level being recorded, regardless of the size of the rectifier.

Each unit comes complete with a power cord and shielded wire for easy connection to the shunt of your rectifier.

Specifications:

Cabinet: 5" x 5" x 2"

AC Power: 115 V, 50/60 Hz.

How to Order:

Please specify the current and millivolt rating of your rectifier shunt.

Options:

Model # 1169-M2
(6-digit mechanical display)

Model # 1169-L2R
(7-digit resettable LCD display)

Model # 1169-L2
(7-digit battery backed LCD display)
